Specialty Crops

A Simply Vital choice.

Simply Vital Biologicals

Locus Agriculture (Locus AG) biologicals are not just nice-to-haves; they're Simply Vital.

Formulated by microbiologists and agronomists using superior strains.
Backed by extensive third-party trials. Manufactured in the USA
in state-of-the-art facilities.

Proven Results:

**Expand Root
System**

**Increase
Nutrient Uptake**

**Enhance
Plant Vigor**

**Boost
Yields**

Superior Strains

Locus AG's crop-specific biologicals feature superior endophytic and rhizosphere-dwelling strains that ensure long-lasting performance.

The products are easy to use in broad application methods, have a high concentration, low use rate and deliver consistent results in different soil types.

Rhizolizer® Duo

Dual-strain biological that combines proprietary *Bacillus* and *Trichoderma* microbes. Proven to boost yields by creating a strong root system and increasing nutrient uptake in the plant.

Unpac®

Naturally derived sophorolipid biosurfactants that distribute water more freely into micropores to break up and treat soil compaction.

TERRADIGM®

Contains proprietary *Bacillus* and *Trichoderma* strains that work quickly to boost tensile strength and root growth, and enhance nutrient availability and uptake in turf and ornamentals.

Pantego®

Features the industry's only free-living, soil-dwelling yeast that works synergistically with beneficial endophytic fungus. Increases the availability of phosphorus and supports extensive root growth for increased nutrient uptake.

Specialty Crop Biologicals

Specialty Liquid

SIZE	TREATS	APP RATE	# PER CASE
------	--------	----------	------------

Pantego® Specialty Liquid

Wickerhamomyces anomalus

128 fl. oz.	25.6 - 8.5 acres	5 - 15 fl. oz. per acre	4
-------------	------------------	-------------------------	---

Crops Treated: Berries, Potatoes, Sugar Beets, Vegetables, Tree Fruits, Tree Nuts, Vines

SIZE	TREATS	APP RATE	# PER CASE
------	--------	----------	------------

Rhizolizer® Duo Specialty Liquid

Trichoderma harzianum, Bacillus amyloliquefaciens

128 fl. oz.	42.6 - 10.6 acres	3 - 12 fl. oz. per acre	4
-------------	-------------------	-------------------------	---

Crops Treated: Berries, Potatoes, Sugar Beets, Vegetables, Tree Fruits, Tree Nuts, Vines

SIZE	TREATS	APP RATE	# PER CASE
------	--------	----------	------------

Rhizolizer® Duo Organic Specialty Liquid

Trichoderma harzianum, Bacillus amyloliquefaciens

128 fl. oz.	42.6 - 10.6 acres	3 - 12 fl. oz. per acre	4
-------------	-------------------	-------------------------	---

Crops Treated: Berries, Potatoes, Sugar Beets, Vegetables, Tree Fruits, Tree Nuts, Vines

Turf & Ornamentals

SIZE	TREATS	APP RATE	# PER CASE
------	--------	----------	------------

Terradigm™ Liquid

Trichoderma harzianum, Bacillus amyloliquefaciens

128 fl. oz.	42.6 - 21.3 acres	3 - 6 fl. oz. per acre	4
-------------	-------------------	------------------------	---

Crops Treated: Turf and Ornamentals

Specialty Wettable Powder

SIZE	TREATS	APP RATE	# PER CASE
Rhizolizer® Duo Specialty Wettable Powder for Fruits & Vegetables <i>Trichoderma harzianum & virens, Bacillus amyloliquefaciens</i>			
20 oz.	20 - 6.7 acres	1 - 3 oz. per acre	6
Crops Treated: All fruit and vegetable crops			

Soil Conditioning

SIZE	TREATS	APP RATE	# PER CASE
Unpac® <i>Sophorolipid</i>			
128 fl. oz.	32 - 64 acres	4 fl. oz. per acre first use, then 2 fl. oz. every other month	2
Soils Treated: All Soil Types			

Maximize Results

Use Rhizolizer Duo & Unpac
for an Extra Yield Boost

Specialty Crop Data

Randomized and Replicated, Third-Party CRO Trials

We partner with contract research organizations (CROs) around the country to test new and existing products on a variety of crops. These third-party trials provide independent analysis on important data points for farmers such as yield, size, quality, and tissue and soil nutrients.
