

AssurClean®

Surface cleaning solution for oilfield transport & storage applications

Biosurfactant-based treatment that quickly and efficiently breaks up cohesion and adhesion of compacted waste

✔ Outperforms equivalent synthetic chemicals

✔ Produces significantly less wastewater

✔ Easily integrates with current cleaning operations

✔ Potential to turn waste into profit

Applications

Effective in variety of transport and storage vessels, tanks, ISOs, barges, railcars and more.

Biosurfactant Advantages

- Small micelle size
- Complex molecular structure
- Multiple chemical active sites per molecule
- Robust, multifunctional features
- Good biodegradability and safe handling

User Benefits

- Ability to penetrate beyond surface
- Effective in diverse waste profiles (organic & inorganic)
- Highly effective at lower dosages
- More efficient cleaning without special equipment
- Safer and less toxic vs. traditional labor-intensive methods

AssurClean Portfolio Breakdown

AssurClean 1020M	Water soluble cleaner for residual, oil-based mud (OBM)
AssurClean 2035H	Highly concentrated water-soluble penetrating aid for compacted, oily sludge
AssurClean 2036H	Highly concentrated water-soluble penetrating aid for compacted, oily sludge with enhanced environmental profile
AssurClean 2120S	Oil-soluble penetrating aid for compacted, oily sludge
AssurClean 2170H	Water-soluble penetrating aids for compacted, oily sludge
AssurClean 9000S	Oil-soluble cleaner for emulsion polymer residuals
